PROJECTS

GUESS THE SHORTEST PATH GAME https://github.com/shubhamsaket49/GUESS-THE-SHORTEST-PATH-GAME
- **Overview: -** Developed to find the shortest path from source and destination. In this game, Player has to guess the shortest path and they have 3 lifelines which save them from the wrong guess. I have used **Dijkstra's Algorithm** (Shortest Path and Path Printing).
- **Outcome: -** After the use of all the available lifeline or the player guesses the correct path, it displays the correct shortest path from source to destination.
- **Technologies: -** Data Structures and Algorithms, C++.

YOUTUBE CLONE https://shubhamsaket49.github.io/Youtube-Clone/
- **Overview: -** It is a **Web Based** cloning project. I have used HTML, CSS for Frontend part and YouTube API to fetch the videos list.
- **Outcome: -** Learning foundation of using an API. I have learnt how to use and call an API inside a project.
- **Technologies: -** HTML, CSS, JavaScript, API.
